Delhi, India

sambhav1034@gmail.com | +91-8920067478 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Computer Science undergraduate with strong fundamentals in data structures, algorithms, and system design. Experienced in building scalable software systems, real-time pipelines, and ML/IoT integrations. Focused on writing efficient, reliable code and solving real-world engineering problems.

EDUCATION

Vellore Institute of Technology, Bhopal	<i>2023 – 2027</i>
B.Tech in Computer Science and Engineering	CGPA: 8.70

Indian Institute of Technology Madras	<i>2024 – 2028</i>
BS in Data Science and Applications (Online)	CGPA: 8.47

TECHNICAL SKILLS

- **Languages:** Python, C++, Java, JavaScript, SQL
- **Core CS:** Data Structures & Algorithms, OOP, System Design
- **Web:** React, Node.js, Flask, REST APIs, Firebase
- **ML/AI:** Scikit-learn, TensorFlow, NLP, Transformers
- **Systems/IoT:** ESP32, Arduino, MQTT, Real-time Streaming
- **Tools:** Git, Docker, Linux, Jupyter

LEADERSHIP & EXPERIENCE

Student Coordinator, Google Developer Groups Campus (GDGC)	<i>VIT Bhopal</i>
---	-------------------

- Led technical workshops and developer-focused initiatives for student community.
- Coordinated cross-functional teams to execute high-impact events and sessions.

Videography Lead (Founding Lead), GDGC VIT Bhopal

- Founded and scaled the videography vertical from scratch.
- Improved content quality and branding across technical events.

PROJECTS

SkilLink — Collaborative Networking Platform	<i>2024</i>
---	-------------

- Designed and built a scalable platform to connect students, researchers, and professionals.
- Implemented ML-based user matching and NLP-powered chatbot for improved discovery.
- Developed backend services using Firebase and Python, ensuring low-latency responses.

MediCare ICU — Real-Time Health Monitoring System	<i>2024 – 2025</i>
--	--------------------

- Built ESP32-based system for real-time streaming of patient vitals.
- Integrated ML-assisted triage support to aid faster clinical decisions.
- Optimized system for low latency, fault tolerance, and continuous operation.
